

Sagnik Paramanik

Full Stack Web Developer

sagnikparamanik169@gmail.com • +91-7363067685 • [linkedin](#) • [github](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer with demonstrated experience architecting, building, and deploying scalable, production-ready web applications using **React.js**, **Node.js**, **Express.js**, and **JavaScript (ES6+)**. Proficient in REST API design, relational and non-relational database management, JWT-based authentication, and component-driven frontend architecture. Passionate about solving complex engineering challenges, writing clean and maintainable code, and continuously delivering user-centric digital experiences with measurable impact.

TECHNICAL SKILLS

Languages:	Java, JavaScript, TypeScript
Frontend:	React.js, TypeScript, HTML5, CSS3, Tailwind CSS, Vite, Framer Motion
Backend:	Node.js, Express.js, REST API Design
Databases:	SQL, MongoDB
Tools & Platforms:	Git, GitHub, Vercel, Render, Figma, VS Code
Core Concepts:	CRUD Operations, API Integration, Responsive Design, OOP, Component Architecture, CI/CD, Role-Based Access Control

PROJECTS

Job Portal Web Application | [Live Demo](#) / [GitHub](#) 2026

- Built a full-stack Job Portal application using React.js, Vite, and Supabase, featuring role-based authentication, job posting and application management, real-time data handling, advanced job search filters, and responsive dashboards for recruiters and candidates. Implemented secure access control with Supabase Auth and Row-Level Security (RLS) and deployed the application using Vercel with Git/GitHub-based CI/CD workflows. .

Artworks Datatable | [Live Demo](#) / [GitHub](#) 2025

- Developed an Artwork Management System using React.js, TypeScript, and PrimeReact to manage and visualize large datasets efficiently. Implemented advanced data-table features such as sorting, filtering, and server-side pagination, while ensuring code quality with ESLint and delivering a responsive, user-friendly interface.

Personal Portfolio Website | [Live Demo](#) / [GitHub](#) 2025

- Developed a responsive personal portfolio website using React.js , Vite , Tailwind CSS, and Framer Motion to showcase projects, technical skills, and experience. Implemented dark/light mode, reusable component architecture, performance optimizations, and automated deployment with GitHub Actions and Vercel .

Mini Weather Monitoring System | *Arduino, C/C++, DHT Sensors, IoT* 2025

- Developed a **real-time environmental monitoring system** using Arduino Uno and DHT-series sensors, capturing and displaying live temperature and humidity readings with sub-second refresh rates.
- Integrated **sensor data acquisition with display modules** for real-time environmental metric visualisation, demonstrating end-to-end hardware-software integration and embedded systems proficiency.

EDUCATION

B.Tech in Electronics & Communication Engineering Sept 2022 – June 2026

B.P. Poddar Institute of Management and Technology, Kolkata, India

Senior Secondary (Class XII) April 2021 – May 2022

Bankura Goenka Vidyayatan, Bankura, India Aggregate: **90.4%**

Secondary (Class X) March 2020

Bankura Zilla School, Bankura, India Aggregate: 71.4%
