- **Portfolio:** <https://portfoliojr-tau.vercel.app>

OBJECTIVE

Full Stack Web Developer with practical experience in building and deploying responsive web applications using React.js, Node.js, Express.js, and JavaScript. Strong understanding of frontend and backend development, REST APIs, and database management. Passionate about problem-solving, continuous learning, and developing scalable user-focused applications.

SKILLS AND INTERESTS

Programming Languages	Java, JavaScript
Frontend Technologies	HTML, CSS, React.js, Tailwind CSS, Vite
Backend Technologies	Node.js, Express.js, REST APIs
Database	SQL, Supabase, MongoDB
Tools & Platforms	Vercel, Render, Figma, VS Code, Git, GitHub
Core Concepts	JWT Authentication, CRUD Operations, API Integration, Responsive Design, OOP

EDUCATION

B. P. Poddar Institute of Management and Technology, Kolkata B.E. in Electronics and Communication Engineering	Sept 2022 - June 2026
Bankura Goenka Vidyayatan, Bankura Senior Secondary (Class XII)	April 2021 – May 2022 Percentage: 90.4
Bankura Zilla School, Bankura Secondary (Class X)	March 2020 Percentage: 71.4

CERTIFICATIONS

- **Java Programming Masterclass** – Udemy
- **Cybersecurity Analyst Virtual Experience Program** – TATA Forge
- **GenAI Data Analytics Virtual Experience Program** – TATA Forge

PROJECTS

- **Portfolio Website:**
 - Developed and deployed a responsive portfolio website using React.js, Vite, Tailwind CSS, and Framer Motion.
 - Implemented dark/light mode, smooth animations, and reusable component architecture for improved scalability and maintainability.
 - Optimized UI responsiveness and deployed the application on Vercel using Git and GitHub for version control.Live Demo: <https://portfoliojr-tau.vercel.app>
GitHub: <https://github.com/SagnikParamanik/portfoliojr>
- **Artworks Datatable Project:**
 - Developed a dynamic artwork management web application using React.js, TypeScript, and PrimeReact.
 - Implemented advanced data table features including sorting, filtering, pagination, and responsive UI for efficient data visualization.
 - Improved frontend performance using component-based architecture and maintained clean code quality with ESLint.
 - Deployed the application on Vercel with GitHub-based version control workflow.Live Demo: <https://artworks-datable.vercel.app>
GitHub: <https://github.com/SagnikParamanik/Artworks-Datable>
- **Job Portal Web Application:**
 - Developed and deployed a full-stack job portal application using React.js, Vite, and Supabase.
 - Implemented secure user authentication, database integration, and dynamic job listing management features.
 - Designed responsive dashboards and optimized frontend performance for improved user experience.
 - Used Git and GitHub for version control and deployed the production-ready application on Vercel.Live Demo: <https://job-portal-development-eta.vercel.app>
GitHub: <https://github.com/SagnikParamanik/job-portal-development>
- **Mini Weather monitoring system using Arduino:**
 - Built a weather monitoring system using Arduino and environmental sensors to measure temperature and humidity in real time.
 - Integrated sensor-based data collection and display mechanisms for basic environmental analysis and monitoring.
